Question #1

What will happen if you try to compile and run the following code

```
public class MyClass {  
    public static void main(String arguments[]) {  
        amethod(arguments),  
    }  
    public void amethod(String[] arguments) {  
        System.out.println(arguments);  
        System.out.println(arguments[1]);  
    }  
}
```

☒ error Can't make static reference to void amethod.

☐ error method main not correct

☐ error array must include parameter

☐ amethod must be declared with String

Question #2

Which of the following methods can be legally inserted in place of the comment //Method Here ?

```
class Base{  
    public void amethod(int i) { }  
}  
public class Scope extends Base{  
    public static void main(String argv[]){  
    }  
    //Method Here  
}
```

☐ void amethod(int i) throws Exception {}

☒ void amethod(long i) throws Exception {}

☒ void amethod(long i){}

☐ public void amethod(int i) throws Exception {}
